CERTIFIED INTERNAL AUDITOR - ISO 14001
COURSE

Introduction

The Time Training Center's Certified Internal Auditor – ISO 14001 course is designed to develop the competencies required to perform effective internal audits of Environmental Management Systems (EMS) based on ISO 14001:2015 standards. This practical course helps participants understand audit principles, plan and conduct audits, report findings, and follow up on corrective actions. It is ideal for individuals seeking to strengthen their auditing capabilities and ensure organizational compliance with environmental policies. As ISO 14001 becomes an operational standard globally, this certification adds significant value to professionals managing environmental impacts.

Learning Objectives

- Understand ISO 14001 EMS requirements
- Plan and execute internal EMS audits
- Apply auditing principles and techniques
- Identify and report non-conformities
- Recommend corrective and preventive actions
- Enhance environmental compliance assurance

Course Details

| | |
|-------------------------|---------------------|
| Mode of Training | Classroom or Online |
| Duration | 5 Days |

Who Should Attend

- Environmental officers and EMS coordinators
- Internal auditors and quality assurance teams
- HSE professionals and compliance managers
- Professionals aiming for ISO 14001 certification
- Consultants supporting environmental audits

Certificate(s)

Participants who complete all requirements and pass the **Competence Validation Exam** will receive a **Certificate of Completion and Competence** issued by **Time Training Center**. This certification affirms both the successful completion of the course and the demonstrated proficiency in the essential skills and knowledge relevant to the respective field or professional role.

Course Outline

Module 1: Introduction to ISO 14001:2015

- Overview of Environmental Management Systems (EMS)
- Key terms, definitions, and structure of ISO 14001
- Understanding the context of the organization

Module 2: Internal Auditing Principles and Planning

- Auditing principles and audit cycle
- Developing internal audit plans and checklists
- Risk-based thinking and audit focus areas

Module 3: Conducting EMS Audits

- Performing interviews and gathering evidence
- Identifying audit findings and writing non-conformities
- Reporting results and classifying audit outcomes

Module 4: Post-Audit Activities and Compliance

- Corrective action plans and audit follow-up
- Continual improvement and management review inputs
- Real-life audit scenarios and group audit simulation

Methodology

We employ a comprehensive and applied learning strategy, integrating theory with real-world implementation:

- ❖ **Conceptual Learning:** Expert-led sessions on catalytic theory and engineering principles
- ❖ **Interactive Workshops:** Group exercises, presentations, and technical discussion forums
- ❖ **Case-Based Learning:** Industry-specific examples and troubleshooting scenarios
- ❖ **Technology Integration:** Digital tools, simulations, and catalyst modeling applications
- ❖ **Assessment:** Pre-tests, post-tests, and Competence Validation Exams for Certified courses to ensure knowledge transfer and skills validation

Note: Instructors may adjust the training approach to fit technical requirements or participant engagement levels.

Instructors

Our instructors for the ISO 14001 Internal Auditor course are certified lead auditors and environmental management professionals with extensive auditing experience across various industries. With over 10 years of practice in ISO implementation and compliance, they bring field-tested insights to the classroom. All trainers are chosen for their ability to blend technical knowledge with hands-on learning. Full trainer profiles will be provided upon scheduling.
